Agree and Strongly Agree

Oct-16
The professional learning was beneficial to my practice in the following ways:

- Application of technology to my lessons.
- Provided a deeper understanding of these technology pieces.
- Gave me insight on how to be more productive in class.
- Having PLC time to plan an activity was a great use of our time. We were able to use what we learned and plan a lesson to use in our classes.
The professional development would be more effective if:

- If it were a half day in length.
- If we had even more computers.
- Examples given were relevant to Kindergarten and not higher grades. More time was given to communicate with one another about using our new ipads.
- Got to be with our entire campus.
Additional comments, thoughts, or ideas:

- Great that PLC work time was included to have these skills and programs put to use just after learning.
- I would have liked for training to include apps that are able to be used in the classroom for reading, science, social studies, and math.
- Need more advanced activities for those who already use what was presented.
